Introduction

It is a distinct honor to present the Test Project for the Floristry (Skill 28) competition at WorldSkills Shanghai 2026.
Designed in strict accordance with the Technical Description (TD) and WorldSkills Occupational Standards (WSOS), these modules are crafted to challenge the versatility and skill of the young florist.
Competitors will be assessed on their ability to master the following:
Transforming abstract ideas into floral reality. Mastering both bold contrasts and subtle harmonies. Achieving balanced proportions and dynamic movement. Demonstrating deep knowledge, precision, and perfect execution.

Organic, botanical materials must remain the primary focus of every piece.
In an effort to reduce waste, all supplied materials have been chosen for maximum impact with minimum environmental footprint.

We invite you to embrace every moment of this incredible opportunity to represent your nation in the beautiful craft of Floristry.

"We Don't Just Arrange Flowers - We Design Joy."
