Description

Module A-2 – Engine management – 2 hours

Instructions to the Competitor

You have 2 x 60-minutes tasks.

- The engine runs rough, diagnose the faults, and restore to proper operating condition.
- The engine has poor acceleration while in drive going up a hill. Diagnose the faults and restore to proper operating condition.

You will have a 10-minute break during the reset halfway through.

Other

Report all faults to the Expert
